

# Peace of mind Providing safety and security to the aging society

## Mission vision / Corporate philosophy

"What if it's my family", "What if it's me". These are the thoughts that we developed this IT robot named MIMAMORI System for elderly. More secure, gentler and more attentive for you and the one you love.

### 01 Home Care

Monitor elderly's activities with multiple sensors and notify their family via LINE when no activities have been detected for a period of time.

### 02 Home Care

Our sensors are wireless and do not need to be charged. It is very easy to install and use.

### 03 Hospital Care

Detect the motions of patients starting get out of bed and notify care providers BEFORE patients get up to prevent accidents.

### 04 New sensor for Hospital and Home

A contactless vital sensor is newly released. It will automatically report when respiration and heart rate deviate from a certain value.
